Digital Imaging Technician

Many years' experience across an array of formats with a strong background of Media Management. I have worked across the UK and abroad in areas such as commercial, drama, food, entertainment, sport, factual, corporate, reality & documentary. I understand the needs of my DoP while possessing a strong technical knowledge of kit. I have created and managed shooting workflows using current digital cameras and overseen a smooth transition into post production. From small single camera shoots to fast turnaround large multi-camera environments with Livegrade experience, having also collaborated over the years with Hijack Post, utilising their kit on high end Commercials and Long Form projects.
